

EXECUTIVE POSITIONING BRIEF

Prepared for Jagan Mohan Reddy R — IAM / IGA Architecture & Delivery Leadership

New Resume Headline & Summary

Replace the current generic title and lead with the identity-specific, evidence-backed positioning below.

Recommended headline

Principal IAM / IGA Architect | Zero Trust & Agentic Identity Governance | 20+ Years Enterprise Identity Transformation

Recommended summary (rewrite)

Identity architecture leader with 20+ years delivering enterprise IAM/IGA transformations for regulated organizations across financial services, healthcare, and manufacturing. Proven track record designing and deploying Zero Trust frameworks, cloud-federated identity platforms (Microsoft Entra ID, Saviynt, SailPoint), and Privileged Identity Management with Just-in-Time access — consistently cutting incident resolution time, eliminating standing access risk, and passing compliance audits (PCI DSS, HIPAA, ISO 27001, GDPR) with zero downtime. Currently extending this expertise to Non-Human Identity governance and agentic AI authorization, having engineered ephemeral credentialing for autonomous agent workloads that closes the 'Confused Deputy' vulnerability — one of the few practitioners with delivered (not theoretical) experience securing AI-to-AI trust. Trusted by executive stakeholders to lead \$40M+ identity programs from architecture through steering-committee governance.

Why This Positioning

This headline and summary lead with the pattern the work actually proves — governed, audited, large-scale identity transformation delivered through a consulting/SI model — rather than the generic "Cybersecurity Manager" umbrella title, which undersells the specialization and dilutes the search-match against IAM-specific roles.

Positioning Summary Table

Core specialization	IAM / IGA architecture and delivery — not generalist cybersecurity
Seniority band	Principal / Staff Architect through Director — not yet evidenced for VP/CISO (no P&L or org-wide budget ownership on record)
Leadership shape	Architect-manager hybrid: hands-on technical authority + people leadership (team of 12) + executive/steering-committee engagement
Career container	20-year IT services / consulting / GCC delivery track (Wipro → NTT Data → IBM → Yash → Infosys → Providence GCC → Akkodis) — not long-tenure in-house
Company-size fit	Enterprise (5,000+ employees) or enterprise-serving SI / consultancy / Big 4 advisory — not early-stage startup
Industry exposure	Financial services, healthcare, manufacturing — regulated sectors under PCI DSS, HIPAA, ISO 27001, GDPR
Tooling signature	Microsoft Entra ecosystem depth (SC-100, SC-300, AZ-104, AZ-305) combined with hands-on Saviynt and SailPoint delivery — a rarer dual-platform combination
Premium differentiator	Delivered (not certified-only) experience in Non-Human Identity governance and agentic AI authorization — a thin, high-demand practitioner pool

Target Job Title Aliases

Consulting Firms / SIs / Big 4 Advisory

- Principal Consultant, IAM/IGA
- IAM Practice Lead / Identity Security Practice Lead
- Identity & Access Management Architect (Advisory)
- Senior Manager, Identity & Access Management (Consulting)
- Zero Trust Architect (Advisory Services)
- Identity Governance Solutions Architect
- Cybersecurity Delivery Lead – Identity
- Engagement Lead, Identity Transformation

Enterprises / MNCs (In-House)

- Director, Identity & Access Management
- Head of IAM / Head of Identity Governance
- Enterprise Identity Architect
- Principal Security Architect (Identity)
- Zero Trust / Identity Architecture Lead
- IAM Program Director
- Director, Identity Security & Governance
- Senior Manager, Cybersecurity – Identity & Access

Global Capability Centers (GCCs)

- IAM Delivery Lead / GCC
- Cybersecurity Engagement Manager – IAM
- Identity Governance Program Lead

Vendor / Platform Ecosystem (Microsoft, Saviynt, SailPoint)

- Identity Solutions Architect
- Field CTO / Solutions Architect, IAM
- Principal Solutions Engineer – Identity
- Customer Success Architect, Identity Governance

Startups / Scale-Ups (secondary fit)

- Head of Identity / Founding IAM Architect
- Staff Security Engineer, Identity
- Identity & Access Management Lead

Premium / Emerging Niche — search these directly

- Agentic Identity Architect
- Non-Human Identity (NHI) Governance Lead
- AI Trust & Authorization Architect
- Machine Identity / Workload Identity Architect
- Agentic AI Security Architect
- Autonomous Systems Identity Lead

Execution Notes

- Lead every application and conversation with the NHI/agentic identity project — it is the rarest, highest-leverage evidence on the resume.

- Prepare a one-line explanation for the recent role rotations (Providence 1 year, Akkodis since Jan 2026) framed as delivery-model rotation across client engagements, not instability.
- Target enterprise (5,000+ employee) organizations or SI/consultancy practices — avoid early-stage startups, where the evidence base (governance-at-scale, not 0-to-1 building) is a weaker match.
- When applying to in-house Director-level roles, be ready to address the absence of P&L or org-wide budget ownership directly rather than letting it surface as a gap in interview.
